DIE COAT - 50

Introduction :

Die Coat-50 is a special water base light refractory coating. It has a good mould release property.

Application :

- It is mainly used in non-ferrous industry for easy removal of casting from the mould.
- It can also be applied for dressing mould and dies.

Advantages :

- Works as mould release agent under high temperatures.
- Works as a refractory coating.
- It can also be stored for a longer period.

How to use :

- Clean the mould / die / tool. Remove dust, oil and rust.
- Stir it thoroughly before use.
- Apply Diecoat – 50 with a brush on the surface, the coating can be in several layers if required.

Precautions :

This coating is not dangerous to skin but hand gloves should be use while handling and using it. Hands should be washed after use. Hands should be washed after use.

Packing :

5 Kg Jar / 50 Kg Plastic Drum.
