## Gas Fired Burners

### Introduction :

- We have specialized in designing and developing High Temperature Gas Burner. We use High Grade raw material which offers products several incomparable attributes such as resistance to wear & tear, longer service life, resistance against corrosion, smooth operations and fine-finish.
- We manufacture Low pressure / High Gas Burners ranging from 100 degree to 1400 degree.
- The offered burner is tested on well defined parameters to avoid any such defect at clients' end. Being manufactured using standard quality raw material and sophisticated technology well installed at our manufacturing unit, it is available at market leading prices in various specifications.
- We supply Gas Burners with maximum fuel efficiency that helps in reducing production cost & saves fuel with the help of efficient combustion systems.

### Application of High Temperature Gas Burners :

- Ceramic tunnel and kilns.
- Heat treatment furnaces.
- Pre heaters galvanizing tanks.
- Air heating and drying.
- Forging furnaces.
- Aluminum melting furnaces.
- Glass melting furnaces.
- Non ferrous melting furnaces.
- Rotary furnace/rotary calciners.
- Boilers, air heaters, incinerators.
