Refractory Coat

Introduction :

- Refractory Coat is a water base coating especially for aluminium extrusion plants.

Application :

- It is used as a launder coating and as a hot-top sealing compound.
- It is mixed with French chalk powder and applied on the gap between hot top and water cooled mould.

Advantages :

- Prevents sticking of molten aluminium to mould.
Provides Excellent sealing to mould and hot top.

How To Use :

- Clean the mould / die / tool. Remove dust, oil and rust.
- Stir it thoroughly before use.
- Again before casting clean the surface to obtain non-sticky continuous metal flow.
- Allow it to dry for few minutes.

Precautions :

- This coating is not dangerous to skin but hand gloves should be use while handling and using it.
- Hands should be washed after use.

Packing :

- 20 Kg Plastic Drum.
